**OFFICE ACTION*****Election/Restriction***

1. Claims 1-20 are pending in this application.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- (A) Claims 1-8, drawn to a pre-clean chamber, classified in class 134, subclass 148
- (B) Claims 9-20, drawn to a method for pre-cleaning a wafer, classified in class 438, subclass 710

2. Inventions (claims 1-8) and (claims 9-20) are related as apparatus and process for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)).

In this case: (Group A compared to Group B) the pre-clean chamber using a source RF power supply for applying a source energy RF to the chamber, which is different than the method/process of pre-cleaning a wafer using a plasma in the chamber because the plasma is involved with reactant gases while the RF power deals with bias power and/or temperature only.

3. Applicant is advised that the reply to this requirement to be completed must include an election of the invention to be examined even though the requirement is traversed (37CFR 1.143)
